1156 New Prospect. Harare (Zimbabwe)

ABOUT ME

A solutions-driven IT professional with a strong foundation in **Computer Science** and hands-on experience in Python, JavaScript, React.js, React Native, Next.js, and Artificial Intelligence. Skilled in troubleshooting, systems support, and software development, with a passion for leveraging technology to drive operational efficiency and innovation. Proven ability to manage IT infrastructure, provide technical support, and implement scalable solutions in fast-paced environments. Known for strong problem-solving abilities, a proactive mindset, and excellent interpersonal and communication skills. Committed to continuous learning and contributing to impactful digital transformation initiatives.

Academic Qualifications

Bachelor's degree in Computer Science (2.1) -University Of Zimbabwe (Feb 2022 to June 2025)

WORK EXPERIENCE

Co-Founder & Chief Technology Officer *Credspace Private Limited (Feb 2024 up to now)*

Duties

- **Innovation and Growth:** Driving continuous innovation within the company to remain at the cutting edge of financial technology and create products that revolutionize how credit and finance are delivered.
- **IT Infrastructure & System Administration:** managing servers, cloud services, operating systems (Windows/Linux), and networking components.
- **Networking & Troubleshooting:** resolving hardware/software/networking issues.
- **Security & Disaster Recovery:** implementing security best practices, access control, and recovery plans.
- **Monitoring & Performance Optimization:** ensuring stable and efficient networks.
- **Technical Support:** end-user support and system deployment.
- **Technical Support & Troubleshooting:** Providing first-line technical support for hardware, software, and networking issues, ensuring timely resolution and minimal downtime.
- **Backend Development:** Designing and implementing server-side logic using languages such as Node.js, Python, or Ruby. This includes creating APIs and integrating them with frontend components.
- **Database Management:** Working with databases to design, implement, and manage data models, ensuring efficient data retrieval and storage for applications.
- **RESTful API Development:** Creating and maintaining RESTful APIs to facilitate communication between the frontend and backend, ensuring data is served efficiently and securely.
- **Frontend Frameworks and Libraries:** Utilizing frontend frameworks and libraries such as React.js to streamline development and enhance the user interface with interactive components.
- **Mobile Application Development:** Utilizing mobile application frameworks and libraries such as react native to streamline development and enhance the user interface with interactive components.

Frontend Developer (Intern) *Intelli Africa Solutions (July 2023 – July 2024)*

Duties

- **User Interface (UI) Development:** Building engaging and intuitive user interfaces that provide a seamless user experience. This involves crafting layouts, selecting appropriate colors and typography, and ensuring consistency across different pages.
- **Responsive Design:** Ensuring that the website or application is responsive and works well on various devices and screen sizes, including desktops, tablets, and mobile devices.
- **Frontend Frameworks and Libraries:** Utilizing frontend frameworks and libraries such as Reactjs to streamline development and enhance the user interface with interactive components.
- **Testing and Debugging:** Conducting thorough testing and debugging to identify and fix issues or bugs related to the frontend code.
- **Infrastructure & System Administration:** Managing IT infrastructure, including servers, cloud services, operating systems (Windows, Linux), and networking components.
- **Security & Disaster Recovery:** Implementing security best practices, managing access controls, and ensuring disaster recovery plans and backups are in place.
- **Asset & License Management:** Maintaining IT inventory and ensuring timely updates of equipment, software licenses, and support documentation.
- **Monitoring & Performance Optimization:** Proactively monitoring systems for performance issues, applying fixes, and improving reliability and efficiency.

Fullstack Developer *CodersDream (Jan 2021 – Aug 2024)*

Duties

- **User Interface (UI) Development:** Building engaging and intuitive user interfaces that provide a seamless user experience. This involves crafting layouts, selecting appropriate colors and typography, and ensuring consistency across different pages.
- **Responsive Design:** Ensuring that the website or application is responsive and works well on various devices and screen sizes, including desktops, tablets, and mobile devices.
- **Frontend Frameworks and Libraries:** Utilizing frontend frameworks and libraries such as Reactjs to streamline development and enhance the user interface with interactive components.
- **Testing and Debugging:** Conducting thorough testing and debugging to identify and fix issues or bugs related to the frontend code.
- **Backend Development:** Designing and implementing server-side logic using languages such as Node.js, Python, or Ruby. This includes creating APIs and integrating them with frontend components.
- **Database Management:** Working with databases (SQL or NoSQL) to design, implement, and manage data models, ensuring efficient data retrieval and storage for applications.
- **RESTful API Development:** Creating and maintaining RESTful APIs to facilitate communication between the frontend and backend, ensuring data is served efficiently and securely.

JOB RELATED SKILLS

At CredSpace, we have successfully disbursed over \$150,000 in loans to civil servants and government pensioners and onboarded over 15,000 clients, underscoring our dedication to enhancing financial accessibility and inclusion in underserved communities. As Co-founder and Chief Technology Officer, I leverage my strong proficiency in Python, JavaScript, React.js, PHP, and Java to architect and implement secure, scalable systems that support business growth and operational efficiency.

I have led the development of diverse technology solutions, including WhatsApp chatbots, mobile applications, enterprise systems, and websites—such as charadzafisheries.co.zw, shomans.co.zw, zimbofx.co.zw, accsoncall.com, airregulatory.co.zw, biz263.co.zw, the Homelink Finance whatsapp chatbot, CredSpace whatsapp chatbot, and the [Prime Edge](#) mobile application. These solutions demonstrate my ability to integrate user-friendly interfaces with robust backend infrastructure to deliver reliable platforms.

My experience also includes overseeing IT infrastructure, coordinating system deployments, and ensuring the stability and performance of cloud-based applications. I apply best practices in cybersecurity, backup, and disaster recovery to safeguard data and ensure business continuity.

In a leadership capacity, I managed a team of six in designing a smart traffic management prototype powered by AI, reflecting my ability to guide cross-functional teams, foster innovation, and deliver results under tight deadlines. My commitment to continuous improvement and hands-on involvement in system administration, end-user support, and technology transformation makes me well-suited for roles that require both technical depth and a collaborative spirit.

ATTRIBUTES

Unquestionable integrity, ability to work under pressure and with people of all levels and different culture, team player, proactive, able to work independently, planning and organizing, result/customer oriented, strong interpersonal skills, good communication skills, leadership and conflict management.
